Walkthrough

Whether you are spending the day cruising to your favorite destination or spending a week aboard with another couple, this yacht has what it takes to get the job done. The extra space provided by a well thought-out floor plan assures that you will not be bumping into each other throughout your journey. The aft cabin full master suite with private head feels like home. Roomy and rich with real cherry wood accents, you will find this a secluded haven while others are making their way around the cabin. The forward VIP with en suite head makes you feel like they went all out to make sure you are having the best time possible. Comfort and style, form and function blend seamlessly throughout this motor yacht.

The emphasis is on entertaining, as noted by the ample seating areas throughout this yacht as well as wet bar aft, huge Ultra leather L shaped lounge and love seating in the salon. Large dining area to starboard comfortably entertains four to six while there is enough room for additional seating at the bar if so desired. The aft cockpit has bench seating for additional conversation area, while the bridge deck boasts incredible views along with an L shaped settee and three captain s chairs. The galley has enough counter space to prepare any gourmet meal as well as a full size dishwasher to get the clean up done after the party is over. There is a third crew/guest cabin across from the galley that will be readily taken over by anyone who is a kid at heart. It also serves as a large storage area for longer voyages.

If you are looking for a motor yacht that has a well laid out engine room, this is one you will want to see in person. The low time engines are clean and well taken care of. ZF gears coupled to twin Volvo diesels are easy to reach and service. There is ample space to inspect the 19KW Kohler generator which was supplied with a full sound shield enclosure to make gunk holing quiet and relaxing. This large engine space has carpeted areas to make it more comfortable to get around, while oil changes are a snap with the Reverso oil change system securely mounted to port side. With components well labeled and accessible, this cool and well vented engine room will make anyone on lesser yachts envious.

There is a spiral staircase leading to the swim transom that is easy to get around on. The ample storage space provided by the optional dock box makes storage of lines and stern anchors easy. Forward topside is a large sun pad area with deck storage for fenders and lines while windlass controls are accessible from the deck or remotely controlled from the bridge.

In conclusion, this yacht represents a great opportunity both in style and livability that is easy on the eyes as well as the pocket book. She is currently lying in our protected harbor on Snead Island near the mouth of Tampa Bay.
