

Marlow Explorer 66

Quality, Versatility, Performance, Value

The 66 is the perfect size for the couple that still want to run their own boat and have the option to have crew come and go. - David Marlow

The Marlow 66 has the interior volume of many 75' boats. Her wide side decks and Portuguese bridge allow her to be run by an experienced couple and many captains find her easy to run single handed. She has the ability to do 20+ knots for over 500 miles. This is about twice the range of most boats above displacement speeds. All this capability while still offering you the flexibility to build the layout that suits your cruising style and personal tastes.

Marlow 66

LOA 76'9" Beam 19' 4" Draft 4' 10"
Fuel 3000 Gal Water 500 Waste 150

Performance

Range at 8.4 knots 2920+ NM
Range at 20 knots, 750 NM
