

Marlow Explorer 80

4 staterooms & crew cruise @23 knots

Our 78E customers love their boats. We built the 80 a little longer to provide a larger aft deck and crew cabin. The increased foot of beam gives you more space in every stateroom - David Marlow

Why compromise when you can have everything you want? The Marlow 80 gives you better range than a slow trawler while providing very fast passage making capabilities; with the ability to do 20+ knots for over 500 miles. All this capability while still offering you the flexibility to build the layout that suits your cruising style and personal tastes. Our own state of the art factory and proprietary manufacturing techniques let us provide this at a lower cost than any yachts in our class.

Marlow 80
